

# Projects

## MMDB (2000-2003)

- Description:* CCP4 Coordinate Library, support of coordinate-related functionality in protein crystallography applications, small molecules database (dictionaries).
- Status:* **Generally completed.** Maintenance, support and further development as needs arise.
- Availability:* CCP4 Release 5 Part 0 software
- URL:* <http://www.ebi.ac.uk/~keb/cldoc>
- Publications:*
1. Software Practice and Experience - in print
  2. Acta Cryst D. - submitted
- Related projects:*
1. CCP4 Molecular Graphics
  2. CCP4 Molecular Building
  3. Clipper
  4. Parts of EBI-MSD deposition site
  5. Parts of EBI-MSD ligand and active site services
  6. Used by various developers world-wide (confirmed by feedback)
  7. Potentially useful for any coordinate-related development: REFMAC, MOLREP and others.

# Projects

## **SSM** (2001-2003)

- Description:* Comparison and alignment of protein structures in 3D, MSD-CCP4 web server / standalone application.
- Status:* **Generally completed.** Anticipated development: a) closer integration with MSD database and possibly SCOP  
b) matching short fragments. Maintenance, support and further development as needs arise.
- Availability:* Web-server, binary distribution from EMBL-EM under academic and commercial licences. SSM core algorithm to be distributed as source code under LGPL-compatible licence. Possible inclusion into later CCP4 releases as a standalone application.
- URL:* <http://www.ebi.ac.uk/msd-srv/ssm>
- Publications:*
1. Software Practice and Experience - in print
  2. Acta Cryst D. - submitted
- Related projects:*
1. CCP4 Molecular Graphics
  2. CCP4 Molecular Building
  3. Structural similarity in EBI-MSD database
  4. Parts of EBI-MSD structural motif service
  5. Used by SCOP
  6. Used by researches world-wide (3200 unique URLs, 20,000 queries, 77 distributions for in-house installation)

# Projects

## Protein interfaces (2004-)

*Description:* Tools for chemical-topological analysis of protein surfaces and structures.

*Status:* **Initiated**, under development.

*Deliverables:* Library of functional procedures, standalone applications, integrating Web-server, database of protein interfaces with tools for similarity queries

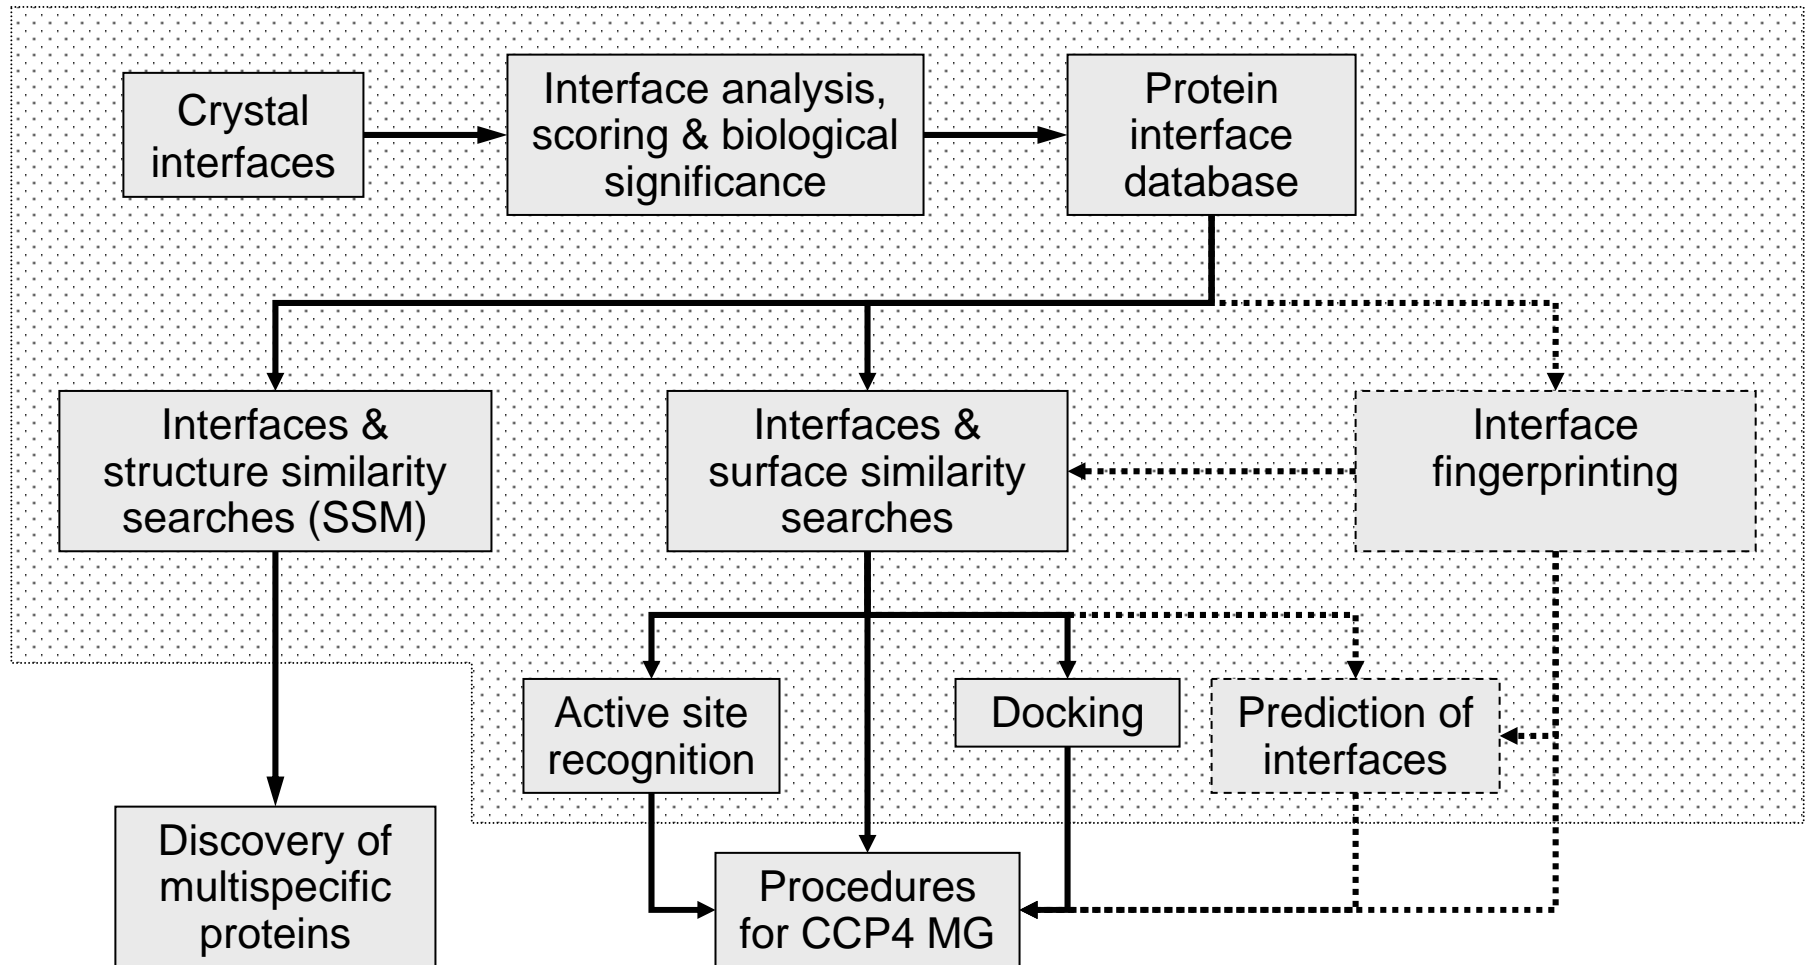

*Potentially useful for:*

1. CCP4 Molecular Graphics (surface analysis/matching, docking).
2. EBI-MSD database
3. Promising for research community

*Collaboration at present with:*

1. Laboratoire d'Enzymologie et Biochimie Structurales, Gif-sur-Yvette, France
2. Janet Thornton's research group, EBI

# Protein Interfaces: project scheme
