

The Structural Genomics Consortium (SGC), within the Faculty of Medicine at the University of Toronto has an exciting opportunity for a Postdoctoral Fellow in the SGC's Huntington's Disease Research Group.

The successful candidate will have research interests and experience in protein structural biology linked to health and disease. The candidate will work within a multidisciplinary environment to investigate proteins and protein complexes associated with Huntington's disease. Candidates will make extensive use of protein biochemistry, biophysical analysis of protein samples, X-ray crystallography and other structural characterization methods.

Qualifications required include:

- Ph.D. in biochemistry, X-ray crystallography, structural biology or a closely related field;
- Knowledge of molecular biology, heterologous protein expression systems, and protein biochemistry and characterization is essential;
- Experience in a high throughput structural biology setting is an advantage;
- Documented strong organizational skills;
- A track record of successfully working within a small team of scientists to achieve aggressive project milestones;
- A track record of collaboration with multiple partners in a multi-disciplinary environment;

The SGC is a public/private partnership with a mandate to carry out protein-based research relevant to human health and drug discovery. The SGC offers a competitive salary and benefits package, including an array of special programs offered to University of Toronto staff.

Interested applicants should forward electronic versions (Microsoft Word or PDF files) of: 1) a cover letter; 2) a Curriculum Vitae; 3) a brief overview of research interests; 4) names and contact information of at least 3 referees who would be willing to provide letters of recommendation. Please send applications to SGC Toronto Business Manager [greg.brothers@utoronto.ca](mailto:greg.brothers@utoronto.ca) before Friday 29<sup>th</sup> March 2019.

*The University of Toronto is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas. All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.*
